Professional Summary

Python Full Stack Developer with hands-on experience building web applications using Django, Flask, and React. Experienced in designing REST APIs, managing relational databases with MySQL and PostgreSQL, and using Git for version control. Currently building ProjectFlow, a full-stack project management platform using React, TypeScript, and FastAPI, and certified in Microsoft Azure AI and Oracle Agentic AI. Looking to contribute to production web applications as a Python Full Stack Developer.

Technical Skills

- **Languages:** Python, JavaScript (ES6+), SQL, HTML5, CSS3
- **Backend:** Django, Flask, FastAPI, REST APIs, Django ORM
- **Frontend:** React, Angular, Bootstrap, jQuery
- **Databases:** PostgreSQL, MySQL, MongoDB, SQLite
- **Tools:** Git, GitHub, Postman, Azure AI Studio

Professional Experience

Python Full Stack Developer Intern, *Quest Innovative Solutions Pvt Ltd* Kochi, Kerala

- Built full-stack web applications with Django (MVT) and Flask, covering server-side logic and front-end pages.
- Designed and integrated RESTful APIs for client-server data exchange.
- Designed MySQL and PostgreSQL schemas and optimized database queries.
- Built responsive interfaces using HTML5, CSS3, JavaScript, Bootstrap, and jQuery.
- Applied OOP principles and used Git and GitHub for version control and issue tracking across the development lifecycle.

Projects

ProjectFlow : Full-Stack Project Management Platform 09/2026 – 10/2026

- Built a React and TypeScript frontend with Kanban boards, dashboard charts, and protected routing, using Zustand for state management.
- Designed an async FastAPI backend with SQLAlchemy and Alembic migrations, with JWT authentication and Argon2id password hashing.
- Planned role-based access control for Admin, Project Manager, and Team Member roles.

Calorie-Tracker Web Application , *Quest Innovative Solutions Pvt Ltd* 11/2024 – 12/2024

- Built a web application with Python, Django, and PostgreSQL to track daily food intake and view meal history.
- Implemented user authentication, intake summaries, and reporting views.
- Wrote optimized Django ORM queries to improve page response times.

Air bag detection, *Academic Project* 01/2024 – 03/2024

- Developed an AI camera-based system to detect airbag deployment in a vehicle cabin and send automatic email alerts to emergency services. - Designed the vehicle cabin monitoring architecture, covering the camera input and the core detection module.
- Technologies: Python, OpenCV, Machine Learning algorithms, SMTP for email alerts.

Certificates

Microsoft Azure AI Essentials: Workloads and Machine Learning on Azure, *LinkedIn Learning* 08/2026

Oracle Agentic AI Foundations Associate Certificate, *Oracle* 2026

Education

Bachelor of Computer Applications (BCA), *University of Calicut | Sadanam Kumaran College* 06/2021 – 05/2024
Palakkad, Kerala

Higher Secondary Education in Computer Science, *GHSS Udma* 06/2019 – 03/2021
Kasaragod, Kerala
